FEATURES

COMPLEMENTARY MINERAL FEED FOR DOGS AND CATS

DESCRIPTION

ENTERO APPETITE, thanks to the action of protected SODIUM BUTYRATE restores the balance of the **INTESTINAL MICROBIOLOGY** and **IMPROVING THE ABSORPTION** of nutrients through the structural restoration of the intestinal walls. **ENTERO APPETITE** promotes the secretion of immunoglobulins, which are responsible for an effective immune response in the intestinal mucosa. It is a particularly attractive nutritional support to be used in cases of metabolic disorders and diarrhea, of pharmacological treatments, in situations of food moving too quickly through the digestive system, malabsorption caused by food intolerances, and in cases of metabolic stress due to poor diet management, such as sudden changes in food, seasonal changes or travel stress.

TECHNOLOGY

Envelopes and preserves the integrity of the active ingredients against degradation over time caused by atmospheric agents (light, humidity, oxygen, etc.) and against oxidation from the oxidizing substances (iron, copper, choline) present in the feed. **Allows the association of incompatible molecules with each other. Slowly releases its contents, rendering them bioavailable and active in the area of the intestines most capable of absorbing them.**

COMPOSITION

Calcium carbonate, carob meal, vegetable hydrogenated oils and fats (from palm), yeasts products from *Saccharomyces cerevisiae*, mojave yucca, sodium salts of organic acids (sodium butyrate*), calcium sulphate dihydrate, vegetable oils and fats (soya), maize starch, glycerine.

***microencapsulated**

ADDITIVES PER KG

Preservatives:

• E 281 - Sodium propionate* 22.400 mg • 1a297 - Fumaric acid* 12.500 mg • E 296 - DL-Malic acid* 5.000 mg • E 330 - Citric acid* 2.500 mg • 1a338 - Orthophosphoric acid* 2.000 mg.

Stabilizing agents:

• E 484 - Glycerol polyethyleneglycol ricinoleate 5.300 mg.

Binders, anti-caking agents and coagulants:

• E 551a - Silicic acid, precipitated and dried 28.000 mg.

Flavouring compounds:

• 2b17034 - Glycine* 40.000 mg.

***microencapsulated**

ANALYTICAL VALUES

• Moisture 5,8% • Sodium 1,2% • Calcium 12,6% • Phosphorus 0,1% • Ash ins. in HCL 2,4%.

DIRECTIONS OF USE

Mix with traditional food, both wet and dry. After mixing it is important not to cook the product.

RECOMMENDED QUANTITIES

0.5-1 g/kg of body weight per day, depending on the needs of the animal. Do not exceed the recommended quantity of 22 g per day. (1 teaspoon: approx. 4 g, 1 tablespoon: approx. 11 g).

METHOD OF CONSERVATION

Produced 3 years before the minimum conservation date indicated. The term refers to goods in sealed original packaging and stored in a cool and dry place.

BARCODE 8032622940152 - 250 g • 8032622940176 - 1 kg • 8032622940190 - 5 kg.
